propane autogas

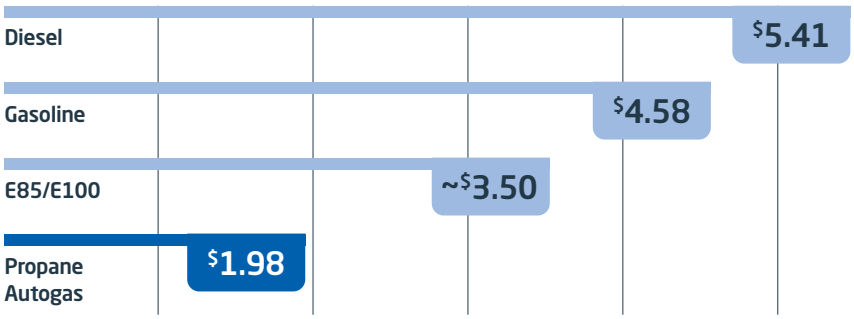

Lower Operating Costs, Proven Across Every Mile

Propane autogas helps reduce fuel and maintenance expenses while giving fleets a straightforward way to control operating costs. As fuel prices continue to fluctuate, fleets can benefit from clear, measurable savings without changing how they operate.

Clear Cost Advantages Across Your Fleet

EXAMPLE NATIONAL AVERAGE FUEL PRICES (Per Gallon Equivalent)

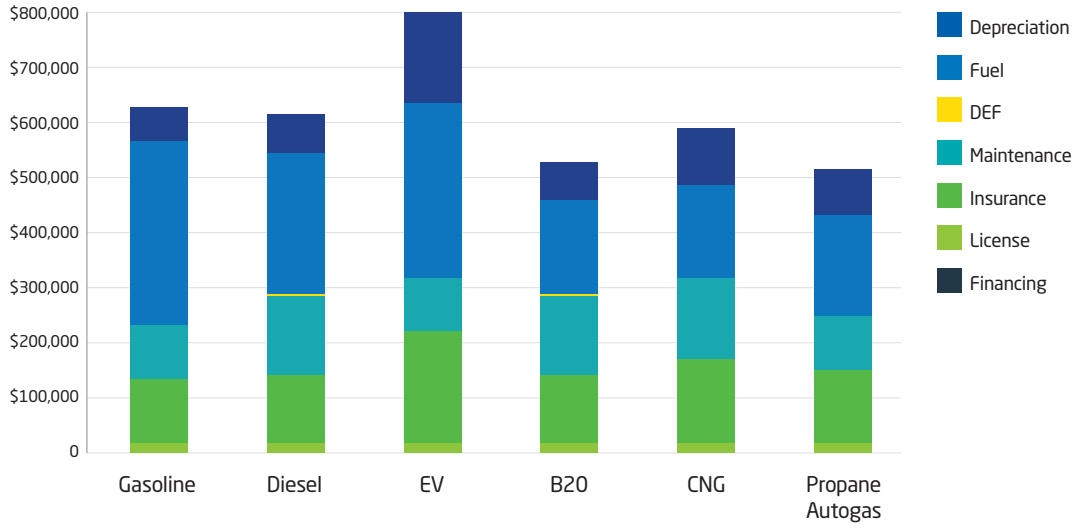

Fuel prices as of May 15, 2026, allianceautogas.com/todays-autogas-price gasprices.aaa.com

Propane autogas consistently delivers a lower cost per gallon than gasoline and diesel. Lock in predictable pricing with your propane provider and simplify budget planning.

Long-Term Cost Advantages Across Your Fleet

When fuel, maintenance, and operating expenses are considered together, propane autogas delivers a lower total cost of ownership than gasoline and diesel in many fleet applications.

Save over $700,000 in 5 years

(10 vehicles | 50,000 miles per year)

Fuel and maintenance savings scale quickly in high-mileage, return-to-base fleets. These savings reflect real-world operating conditions, helping fleets reduce costs without changing how they operate.

FLEET SIZE	MILES PER YEAR	5-YEAR SAVINGS
10	26,500	$384,250
10	50,000	$725,000
25	26,500	$960,625

Lower Maintenance Costs Through Simpler Systems

Propane autogas engines use cleaner combustion and fewer components than diesel systems—reducing maintenance requirements, lowering lifetime costs, and helping fleets stay on the road.

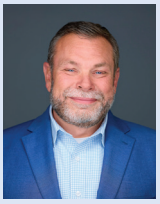

DIESEL COMPLEXITY	PROPANE SIMPLICITY
Diesel particulate filters (DPF)	No DPF required
Diesel exhaust fluid (DEF)	No DEF required
Regeneration cycles	No regeneration cycles
Higher service frequency	Reduced maintenance needs

Lower Infrastructure Costs That Scale with Your Fleet

- ✔ Lower upfront investment than EV charging or CNG in many cases.
- ✔ Scalable solutions that grow with your fleet.
- ✔ On-site fueling supports return-to-base operations.
- ✔ Supplier-supported options often available.

More Predictable Fuel Costs Over Time

On-site refueling provides greater control over how fuel is purchased and managed, supporting long-term budget planning and reducing exposure to fuel price swings.
